

raw text

```
print("Hello, World!")
def fib(n):
    fib_list = [1, 1]
    for i in range(2, n):
        fib_list.append(fib_list[i - 1] + fib_list[i - 2])
    return fib_list[n - 1]

print(fib(3))
print(fib(9))
```

raw from file

```
def fib(n):
    fib_list = [1, 1]
    for i in range(2, n):
        fib_list.append(fib_list[i - 1] + fib_list[i - 2])
    return fib_list[n - 1]

if __name__ == "__main__":
    print(fib(3))
    print(fib(9))
```

code (raw code)

```
file.py
1 print("Hello, World!")
2 def fib(n):
3     fib_list = [1, 1]
4     for i in range(2, n):
5         fib_list.append(fib_list[i - 1] + fib_list[i - 2])
6     return fib_list[n - 1]
7
8 print(fib(3))
9 print(fib(9))
```

code-from-file

```
file.py
1 def fib(n):
2     fib_list = [1, 1]
3     for i in range(2, n):
4         fib_list.append(fib_list[i - 1] + fib_list[i - 2])
5     return fib_list[n - 1]
6
7 if __name__ == "__main__":
8     print(fib(3))
9     print(fib(9))
10
```

Usage Tips

Add this line to your document:

```
1 #let include-code(path, ..args) = code-from-file(read(path), lang:
  path.split(".").at(-1), header: path, ..args)
2
3 ...
4 #include-code("your/code/path")
5 ...
```

Result example:

fib.py

```
1 def fib(n):
2     fib_list = [1, 1]
3     for i in range(2, n):
4         fib_list.append(fib_list[i - 1] + fib_list[i - 2])
5     return fib_list[n - 1]
6
7 if __name__ == "__main__":
8     print(fib(3))
9     print(fib(9))
10
```

codedis (file)

```
1 def fib(n):
2     fib_list = [1, 1]
3     for i in range(2, n):
4         fib_list.append(fib_list[i - 1] + fib_list[i - 2])
5     return fib_list[n - 1]
6
7 if __name__ == "__main__":
8     print(fib(3))
9     print(fib(9))
10
```
